

Starting Pixel Live! 25

15th Oct 2025 | RichMix, Shoreditch London

Where Innovation Meets Community

Virtual production is no longer emerging – it's expanding, diversifying, and rapidly maturing. Starting Pixel Live 2025 brings this momentum to life with a full-day, two-track conference at Rich Mix in Shoreditch, London. Over 250 creators, technologists, and innovators will gather for more than 14 sessions exploring the cutting edge of content creation.

This isn't just an event – it's the beating heart of a passionate global community. Starting Pixel is home to over 1,000 active members across 70+ countries – producers, directors, studio leads, artists, and developers shaping the tools, workflows, and ideas of tomorrow.

New for 2025, we're expanding with a fully dedicated networking space – reflecting our community's call for deeper collaboration, real conversations, and shared momentum. If you're building the future of real-time production – from LED and camera tracking to AI, VADs, and 3D environments – this is where you meet the people making it happen.

How to get involved
